

Last week (14-18-09-2020) was a very busy week in terms of educating youth about the Election to Seimas. Since I was able to understand the process of work in parliament and get insights of it, thanks to Erasmus+ project, I wanted to share the knowledge with my community. In fact, I with Karolina am the member of a politically impartial monitoring network, where we educate youth especially about politics and organize debates, discussions with politicians. As I mentioned earlier, last week we held events to inform our school's seniors about upcoming actions. Educational activities in the project broadened my horizons and opened ways to new opportunities. Here are a few photos.
